

# Data Privacy, Cybersecurity & Technology

## Our Practice

Experience relating to:

- Data Protection Compliance
- Data Protection Counsel
- Transactions & Vendor Management
- Litigation, Investigations and Regulatory Proceedings
- Training and awareness programs
- Cybersecurity
- Artificial Intelligence (AI)
- Emerging and disruptive technologies
- Sector-specific expertise (including LifeSciences, Telecoms, Big Tech, Hospitality, Banking and Finance)

*“A highly specialized team that consistently guides clients with innovative solutions and alternatives in critical and complex technology and privacy challenges, inspiring trust.”*

## Data Privacy

Our **Key Services** include:

- **Compliance Programs and Counseling:** Taking into account regulatory guidance and enforcement together with case law, we guide organizations through every aspect of data protection and privacy, from data mapping & gap analyses, privacy notices/and consent management to records of processing activities, website and cookie compliance, internal policies and procedures, DPO designation & notification, DPIAs, agreements, cross-border data transfers, data subject rights management.
- **Data and Cyber Incident Preparation and Response:** In addition to supporting clients in developing an incident response plan, we offer immediate and experience-driven guidance on handling data incidents and breaches by assisting with internal and external investigations as well as managing notifications to impacted individuals and authorities, including parallel notification requirements under GDPR, NIS2 and ePrivacy.
- **Data-Driven Transactions & Vendor Management:** We provide our clients with all essential insights to facilitate informed decision-making before, during, and after a transaction. Our services include drafting detailed reports with actionable recommendations to mitigate risks, assistance in negotiating and drafting transactional documents and agreements, carrying out detailed data protection gap assessments, drafting notices to employees and/or customers regarding transfers of their data and advising on transfer of databases. We also counsel on management of third-party vendors and technology outsourcing.
- **Litigation & Investigations:** We advise and represent clients in data protection and privacy-related internal or external investigations as well as disputes before the supervisory authority and courts. Our practice is backed by the KG litigation team, renowned for their extensive experience across all levels of jurisdiction and in cross-border litigation.

- **DPO and DPO Support Services:** We act as appointed DPOs and provide ongoing legal and operational support to DPOs, privacy stewards, and relevant officers, combining strategic guidance with practical assistance. Our services include tailored regulatory updates, real-time compliance advice, support with DPO appointments and notifications, and expert guidance on data breach management and communications.
- **Training and awareness programs:** We offer up-to-date training and awareness sessions to our clients, ensuring that the content is tailored to their specific roles and functions in their organization while fostering a privacy-conscious culture throughout their operations.
- **Monthly Newsletters & Monitoring Reports:** We draft monthly newsletters and comprehensive monitoring reports, carefully customized to align with our clients' specific industry needs and interests, providing timely insights that empower proactive compliance.

## Cybersecurity

By working alongside a trusted technical cybersecurity partner, we combine legal, regulatory, and technical expertise to deliver comprehensive, end-to-end cybersecurity services helping organizations navigate complex laws, including the Greek NIS2 implementing law, DORA, and the Cyber Resilience Act. Our Services include:

- **Governance, Policies and Risk management:** We guide clients through every step, from registration with competent authorities to internal governance and vendor management, and, in collaboration with cybersecurity experts, design and update policies that ensure board-level oversight while proactively managing risks.
- **Incident response & Crisis Management:** Our 24/7 legal support provides prompt, strategic guidance for local and cross-border cyber incidents, ensuring compliance with cybersecurity regulations while upholding GDPR and privacy requirements. We also support entities with incident reporting, communication plans and post-incident measures to minimize disruption and reputational impact.
- **Support in transactions and vendor contracts:** We provide expert guidance on cybersecurity aspects of contracts and transactions, identifying risks and strengthening our client's position.
- **Training and awareness:** We deliver tailored training, with real-life examples and timely regulatory insights to empower leadership and employees in the new digital landscape.
- **Audit preparation and dispute management:** We help organizations prepare for regulatory inspections, internal and external audits, and contractual reviews. In the event of disputes or claims arising from cybersecurity incidents, we provide strategic legal guidance to manage civil, contractual, and regulatory liabilities, protect your interests, and minimize financial, operational, and reputational impact.

## Artificial Intelligence (AI)

In collaboration with a specialized technical company, we provide integrated legal and technical support, offering end-to-end, holistic AI compliance services, which include:

- **AI compliance framework:** We design end-to-end AI compliance programs tailored to businesses' role and risk profile. We ensure our clients' compliance with their regulatory obligations, mapping regulatory requirements across sectors and jurisdictions through our professional network.
- **AI Regulatory Advice:** We provide strategic guidance on national and international AI regulations, including the EU AI Act and Greek Law 4961/2022, while ensuring alignment with parallel legal frameworks such as product safety, cybersecurity, and intellectual property law.
- **Technical documentation and conformity support:** Our team supports the preparation of technical documentation under Article 11, assists clients throughout conformity assessment and CE marking processes, and provides guidance on effective engagement with notified bodies and regulatory authorities.
- **AI governance:** We support organizations in designing and implementing robust AI governance frameworks. Our services include developing responsible AI policies and internal governance structures, establishing clear accountability, oversight, and decision-making processes, and creating ethical AI and data-usage standards.
- **AI literacy:** We deliver tailored training on the EU AI Act and related regulatory requirements for executives, boards, and staff, helping organizations build strong internal AI awareness and compliance capabilities.
- **AI Impact Assessment:** We conduct tailored assessments to evaluate the impact of AI systems under applicable laws, including Data Protection Impact Assessments (DPIAs), Algorithmic Impact Assessments (AIA) and Fundamental Rights Impact Assessments (FRIA), to help organisations comply with regulatory requirements and manage potential legal and ethical risks.
- **AI Procurement and Contracting:** We support clients in negotiating and drafting contracts with AI solution vendors and developers.
- **AI Disputes - Litigation:** We develop effective litigation strategies for companies facing AI-related disputes, including regulatory investigations, civil claims, and customer complaints. ensuring robust protection of their interests and reputation.

Our dedicated team continuously monitors advancements in AI technologies and related regulations, equipping us to effectively support clients in navigating the intricate legal complexities of AI.

## Sector-Specific Expertise

- **Life Sciences and Healthcare:** We provide ongoing legal support to leading pharmaceutical companies across all facets of their operations, with experience spanning numerous aspects of the industry, including extensive work related to clinical trials, pharmacovigilance (PV) and navigating complex regulatory challenges.
- **Telecoms** - We offer comprehensive legal support to telecom companies, ensuring their compliance with the ever-evolving legal and regulatory framework. We assist in navigating complex issues around communications secrecy, data retention, data and network security and handling data breach incidents.
- **Big Tech and IT Services** - We deliver tech-savvy solutions and expert legal advice tailored for Big Tech companies and IT service providers. Our services encompass drafting and reviewing data protection policies and procedures, offering guidance to strengthen network and information system security, and assisting with contract negotiations.
- **Financial Sector:** Our industry-specific expertise extends to the highly complex banking and payments industry, where we provide tailored strategic guidance to meet the new challenges posed by the increasingly complex payments ecosystem.
- **New and Emerging Technologies:** Our clients benefit from our extensive expertise in emerging technologies, receiving comprehensive legal guidance on the adoption and integration of innovative solutions such as the Internet of Things (IoT) and blockchain. We ensure that these technologies are seamlessly aligned with the existing regulatory framework.

## Notable Projects & Work Highlights

Below is a list of the most notable projects we have handled the last years:

- **Delivered comprehensive GDPR compliance solutions** for clients across multiple sectors, including biotech, digital health, hospitality banking and finance, e-commerce (e-shops) education and telecommunications. Our services included all necessary privacy notices, policies and procedures, contracts (e.g., DPAs), DPIAs, etc.
- **Providing ongoing legal counsel** to a leading pharmaceutical company, addressing the full spectrum of its privacy needs, including GDPR compliance of clinical trials, research activities, patient support, market programs, pharmacovigilance, EFPIA disclosures, and other complex regulatory matters.
- **Advised major telecommunications operators** on complex data privacy and cybersecurity matters, including customer data management, network security and cybersecurity, and compliance with sector-specific regulations. Delivered risk and privacy impact assessments and developed robust cyber incident response frameworks.
- **Represented numerous corporations and individuals before courts and key national authorities, including** the Hellenic Authority for Communication Security and Privacy (ADAΕ) and the Hellenic Data Protection Authority.
- **Provided data breach response and remediation services** to high-profile clients with cross-border activities. Drafted post-breach notifications, advised on corrective measures, and led incident containment.
- **Conducted privacy due diligence projects** in numerous high-value M&A transactions, by drafting Red Flag Reports and advising in post-transactional documents.
- **Assisted multiple companies in the banking and financial sector**, (e.g., banks, payment service providers) in complying with their obligations under general and sectoral laws on privacy and data protection, including completing compliance questionnaires for all related processing activities, supporting with data protection safeguards for POS systems, financial behavior databases, and risk profiling compliance.
- **Guided multinational organizations** on navigating cross-border **data transfer challenges** and multijurisdictional data flows, by advising on compliant data transfer mechanisms.
- **Advised companies on workplace data protection and privacy compliance**, including drafting employee notices, advising on CCTV usage, ICT monitoring, geolocation tracking and background checks.
- **Performed Data Protection Impact Assessments (DPIAs)** for a wide range of high-risk data processing activities, including CCTV surveillance, fleet tracking systems and AI-driven profiling tools.
- **Developed detailed multijurisdictional questionnaires addressing clinical trial and data privacy matters** to facilitate compliance of CROs operations across multiple countries.
- **Assisted - automotive companies in complying with privacy requirements for telematics GPS-based applications and vehicle geolocation monitoring systems.**
- **Achieved regulatory readiness** for domestic and international clients under the national NIS2 implementation framework, ensuring successful registration with competent authorities and advising on board-level cyber risk oversight and governance structures.

## “Your Trusted Advisors in a Digital World”

In today's fast-paced and technology-driven world, we are committed to staying ahead of the curve, expertly guiding our clients through the intricate legal and commercial challenges they face while enabling their businesses to thrive.

With a deep understanding of the complex legal and regulatory landscape, our law firm is recognized for delivering top-tier legal services to domestic and international organizations across multiple industries on data protection, privacy, cybersecurity and emerging technology issues.

### Our People

KG Law Firm's Data Privacy, Cybersecurity & Technology Practice is a dedicated multi-member team of lawyers with extensive expertise in the sector. Led by Head Partner Irene C. Kyriakides, the team adopts a proactive, solution-oriented approach to data privacy and technology issues. We act in close collaboration with a specialized technical cybersecurity partner, enabling us to deliver holistic, end-to-end services. This integrated approach ensures that legal, regulatory, and technical considerations are addressed in parallel. This makes KG Law a trusted partner for clients navigating high-stakes cybersecurity, privacy, and data protection issues in today's dynamic digital environment.

*“Our team “is recognized for top quality service, in-depth legal support, management orientated and beneficial-focused solutions, responsiveness and dedication. Clients value our proactive approach and inventive legal structures in complex cases”*
